Nalgonda, Telangana, India

OBJECTIVE

Passionate developer interested in creating impactful AI-powered applications, aiming to contribute to product development through problem-solving, rapid learning, and practical full-stack engineering skills.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies, Basar *Expected Apr 2027*
Integrated B.Tech in Computer Science and Engineering CGPA: 8.71 / 10
Pre-University Course (PUC) Foundation Years PUC CGPA: 9.14 / 10
Secondary School Certificate (SSC) – ZPHS, Kondamallepally CGPA: 10 / 10

EXPERIENCE

SolveSystems Lab *Aug 2026*
AI/ML Intern

- Developed web scraping workflows using Python, Playwright, and Twikit with Claude for automated data collection and processing.
- Processed collected data to identify relevant information and derive useful insights for downstream applications.
- Worked with Gemini API and LLMs for AI-based applications and AI-assisted task.
- Worked on Hindi and English voice-dubbing workflows using Voice Cloning Studio.

MORGOCK *Jun 2026 – sept 2026*
Full Stack Developer Intern

- Developed responsive web pages using React.js and modern web development practices.
- Assisted in backend development and REST API integration to support frontend features.
- Resolved application bugs, and improved responsiveness.

PROJECTS

AI-Powered Construction Project Intelligence System

- Developed a multimodal RAG-based project intelligence system to manage and query construction project reports, structured data, and site images across multiple projects.
- Integrated VLM-based image understanding and semantic embeddings to make textual and visual project information searchable using metadata-aware retrieval.
- Built project-specific and global AI search with historical progress comparison, structured responses, and evidence-backed answers linked to original documents and images stored in Cloudinary.
- **Tech Stack:** Multimodal RAG, LLM, VLM, Vector Database, Semantic Embeddings, Cloudinary

FreshCuts – AI-Powered E-Commerce Platform *Live Demo | GitHub*

- Developed and deployed a full-stack e-commerce application using Django and Render with an integrated AI chatbot.
- Implemented authentication, role-based access control, session management, product catalog, shopping cart, orders, offers, and admin functionality.
- **Tech Stack:** Python, Django, HTML, CSS, JavaScript, SQLite3

Virtual AI Teaching Robot – Conversational Learning Assistant *GitHub link*

- Built an AI-powered teaching assistant with voice interaction for explaining concepts and answering user questions.
- Integrated speech recognition, text-to-speech, and offline LLMs for conversational learning.
- Developed backend APIs and contextual conversation flow for interactive responses.
- **Tech Stack:** Python, LLMs, Speech Recognition, Text-to-Speech, Backend APIs

TECHNICAL SKILLS

Languages:	Python, JavaScript, SQL
Backend:	Django, REST APIs
Frontend:	React.js, HTML, CSS
Databases:	MySQL, SQLite, Vector Databases
AI/ML:	Machine Learning, RAG, Multimodal RAG, LLMs, Gemini API, Semantic Embeddings
Tools:	Git, GitHub, Playwright,
Other:	Problem Solving, Debugging, API Integration

POSITIONS & ACHIEVEMENTS

- Qualified GATE 2026 in Computer Science and Information Technology (CS).
- Completed a 45-day intensive AI/ML training program and earned selection for an AI/ML Engineer internship based on performance.
- Served as Class Representative (CR) for two years, coordinating communication between students and faculty and representing class.
- Served as Sports Coordinator for CSE Annual Games, coordinating sports activities and student participation.
- Completed a five-day “Design Fly the Drones” workshop by TiHAN, IIT Hyderabad and RGUKT-Basar, gaining exposure to drone design, operation, and UAV fundamentals.
