DIVYA THEAJ CHILUMULA

tejchilumula@gmail.com | +91 9347978532 | linkedin.com/in/chilumula-divya-theaj | github.com/teja338 | Nalgonda, Telangana,India

OBJECTIVE

Passionate developer interested in creating impactful AI-powered applications, aiming to contribute to product development through problem-solving, rapid learning, and practical full-stack engineering skills.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies, Basar *Expected Apr 2027*
Integrated B.Tech in Computer Science and Engineering CGPA: 8.71 / 10
Pre-University Course (PUC) Foundation Years PUC CGPA: 9.14 / 10

EXPERIENCE

SolveSystems Lab – (AI/ML Intern) *Aug 2026*

- Developed web scraping workflows using Python, Playwright, and Twikit with Claude for automated data collection and processing.
- Processed collected data to identify relevant information and derive useful insights for downstream applications.
- Worked with Gemini API and LLMs for AI-based applications and AI-assisted tasks.
- Worked on Hindi and English voice-dubbing workflows using Voice Cloning Studio.

MORGOCK – (Full Stack Developer Intern) *Jun 2026 – Sep 2026*

- Developed responsive web pages using React.js and modern web development practices.
- Assisted in backend development and REST API integration to support frontend features.
- Resolved application bugs and improved application responsiveness.

PROJECTS

JEV-Powered Adaptive Multi-Agent RAG – Decision-First AI Agent Router

- Built a **JEV-powered multi-agent AI system** that dynamically routes queries across RAG, Web, and Code agents using structured outputs.
- Implemented **Adaptive RAG** with query rewriting, hybrid vector + BM25 retrieval, reranking, context compression, grounded citations.
- Designed a **verification-driven feedback loop** that detects insufficient evidence and uses JEV to retry or re-route workflows.
- **Tech Stack:** Python, FastAPI, JEV, OpenRouter, RAG, ChromaDB, BM25, React, JavaScript, CSS

FreshCuts –E-Commerce Platform *Live Demo* | *GitHub*

- Developed and deployed a full-stack e-commerce application using **Django and Render**, integrating an AI chatbot.
- Implemented **authentication, role-based access control, session management, product catalog, shopping cart, orders, offers, and admin functionality** using Django's built-in authentication and ORM.
- Integrated an **AI-powered chatbot** to assist users with product-related queries and improve the overall shopping experience.
- **Tech Stack:** Python, Django, HTML, CSS, JavaScript, SQLite3

AI-Powered Construction Project Intelligence System *GitHub*

- Developed a **multimodal RAG-based project intelligence system** to manage and query construction project reports, structured data, and site images across multiple projects.
- Integrated **VLM-based image understanding** and semantic embeddings to make textual and visual project information searchable using metadata-aware retrieval.
- Built project-specific and global AI search with **historical progress comparison**, structured responses, and evidence-backed answers linked to original documents and images stored in Cloudinary.
- **Tech Stack:** Multimodal RAG, LLM, VLM, Vector Database, Semantic Embeddings, Cloudinary

Lost & Found Management System

- Designed and implemented **14 REST API endpoints** across authentication, lost/found item posts, and user-profile modules using **Express.js** and **Mongoose ODM** on **MongoDB**, enforcing ownership-based authorization on update/delete operations.
- Built **JWT-based authentication** with httpOnly cookies and custom **Express middleware** for route protection.
- Engineered an **AI-powered matching pipeline** generating text **embeddings** via the **Gemini API** and ranking matches using **cosine similarity**, combined with keyword search for hybrid matching.
- **Tech Stack:** Node.js, Express.js, React.js, MongoDB, JWT, Gemini API

TECHNICAL SKILLS

Languages:	Python, JavaScript, SQL
Backend:	Django, FastAPI, Node.js, Express.js, REST APIs
Frontend:	React.js, HTML, CSS
Databases:	MySQL, SQLite, MongoDB, ChromaDB, Vector Databases
AI/ML:	Machine Learning, RAG, Agentic RAG, Multimodal RAG, LLMs, VLMs, Semantic Embeddings, JEV AI Model
Tools:	Git, GitHub, Playwright (Web Scraping)
Core CS:	DBMS, Operating Systems, OOPS, Computer Networks, Problem Solving

POSITIONS & ACHIEVEMENTS

- Qualified **GATE 2026** in Computer Science and Information Technology (CS).
- Completed a **45-day intensive AI/ML training program** and earned selection for an AI/ML Engineer internship based on performance.
- Served as **Class Representative (CR)** for two years, coordinating communication between students and faculty and representing the class.
- Served as **Sports Coordinator** for CSE Annual Games, coordinating sports activities and student participation.
